Attention to detail

PROJECTS

Nomyfy — Full-Stack Health & Wellness Platform

Jun 2025 - Oct 2025

- Built core backend APIs and data layer in ASP.NET Core 8 / EF Core with JWT auth and third-party integrations, as part of a full-stack team. Implemented features for health tracking, social challenges, and specialist booking using C#, React 19, SQL Server, Redis, MinIO, Docker, Stripe, and Clean Architecture.

Cukolini Graphs — Work Schedule Management Web App

Aug 2024 - Nov 2024

- Implemented ASP.NET Core MVC (.NET 8) application for automatic shift generation based on employee preferences. Designed database schema and migrations with EF Core 8, added role-based auth with Identity, and built an adaptive UI using JavaScript and CSS, applying Strategy, Command, and Repository patterns.

Ann's Decor - Business Website

Apr 2015 - May 2015

- Developed a responsive business website for an event design company using HTML5, CSS3, JavaScript, and Bootstrap, customized from a BootstrapMade template. The site features an interactive portfolio gallery, a contact form with a PHP backend, and an animated testimonials carousel.
